

EHS AND LOSS CONTROL CONSULTING SERVICES

BUILDING ASSURANCE – Ensuring your company or projects are safe, compliant, and reliable from start to finish.

At TSIB, safety is more than a checklist – it’s embedded in the way we operate. With deep expertise in construction and insurance risk management, we deliver practical, field-driven Environmental, Health, Safety (EHS), and Loss Control solutions that reduce risk, enhance performance, and protect both people and project outcomes.

Advancing Safety. Reducing Risk. Strengthening Performance.

Our approach integrates EHS and Loss Control into every phase of construction through structured planning, proactive risk management, and continuous performance improvement. Built on proven methodologies, our services transform best practices into consistent field execution—ensuring safer jobsites and stronger project delivery.

Our scalable service model allows clients to engage depending on company or project needs.

CORE SERVICE OFFERINGS

Advisory & Program Development

We can evaluate and enhance safety programs to align with industry standards and client requirements.

- Advise on the development, implementation, and continuous improvement of safety performance metrics, reporting systems, and related management processes.
- Review existing safety programs and assist in aligning them with applicable client, owner, and contractual safety requirements.
- Support the development and facilitation of safety training programs and materials.
- Assist with safety campaigns and workforce engagement initiatives aimed at improving overall safety awareness and participation.

Owner/Client Representation (EHS Oversight)

We can act as the owner's safety representative ensuring contractor compliance and program integrity, reducing risk exposure and strengthening overall project oversight.

- Perform independent safety audits of contractors.
- Ensure contractor compliance with owner safety standards.

Leadership Development & Coaching

We can enhance a company or a project's safety culture through leadership engagement, field coaching, and targeted training programs that reinforce accountability and position safety as a core value.

- Provide guidance and strategic support to enhance the company safety culture.
- Present safety coaching and training to operational leadership and field supervisors.
- Facilitate "safety as a value" workshops and accountability programs.

Field-Based Safety Support & Oversight

We can provide on-site safety support to improve hazard recognition, planning, and coordination.

- Conduct routine site safety inspections, audits, and walkthroughs.
- Assist superintendents and foremen with daily Job Hazard Analyses (JHAs) and pre-task planning (PTPs).
- Support subcontractor safety oversight and coordination.

Preconstruction & Safety Planning Integration

We can integrate safety into preconstruction planning to identify and mitigate risks early, minimizing downstream impacts to schedule, cost, and safety performance.

- Assist with high-level job-site hazard identification and risk assessment activities.
- Support constructability reviews with a safety / risk lens (e.g., fall protection, crane picks, logistics).
- Support high-risk work planning (confined space, critical lifts, energized work, etc.).
- Develop site-specific safety plans (SSSP).

Subcontractor Prequalification & Management

We can evaluate subcontractor safety performance (EMR, TRIR, OSHA logs, citations) and manage compliance throughout the project lifecycle to maintain consistent safety standards.

- Develop and manage subcontractor prequalification programs.
- Monitor subcontractor compliance and performance throughout the project lifecycle.

Regulatory Compliance & Audit Services

We can provide Occupational Safety and Health Administration (OSHA) guidance, conduct mock inspections, perform gap analyses, and help proactively manage regulatory compliance risks.

- Assist with OSHA citations, response strategies, and informal conferences.
- Perform gap analyses against OSHA and client-specific standards.

Incident & Claims Management Support

We can support incident investigations and claims analysis to identify root causes and trends, reducing claim frequency, severity, and overall project costs.

- Analyze loss trends and claims data to identify systemic issues and provide program improvement recommendations.
- Coordinate with insurance carriers on loss control strategies.
- Assist with return-to-work and injury management programs.

Safety Technology & Innovation

We can help implement advanced safety technologies, including wearables, AI monitoring, and digital platforms to enhance visibility, accountability, and real-time performance tracking.

- Support digital safety platforms (e.g., Procore, SafetyNet, HammerTech, etc.).
- Develop dashboards for real-time safety performance tracking.

Crisis Management & Business Continuity

We can prepare organizations and projects for critical events through emergency planning, simulations, and real-time crisis response support.

- Provide crisis response support (serious incidents, fatalities, media events).
- Conduct tabletop exercises and emergency simulations.

Fleet & Driver Safety Programs

We can develop driver and safety policies and implement risk reduction strategies to improve fleet safety performance.

Fire & Life Safety

We can provide fire prevention planning, code compliance support, and life safety program development.

Minority Business Enterprise (MBE) Compliance

We can support supplier diversity goals by providing certified MBE EHS and Loss Control consulting services that combine compliance with high-impact, field-driven safety performance.

Additional Services

- On-Site Medical & Injury Prevention Programs
- Industrial Hygiene Assessments/Services
- Environmental Services
- Human Performance & Behavior-Based Safety

Delivering Measurable Results

By planning strategically and partnering collaboratively, TSIB helps construction teams address risks early - protecting workers, minimizing disruptions, and supporting the successful completion of high-profile projects.

Why TSIB

Our clients choose TSIB because our mission is simple - Remove barriers to safety, prevent incidents before they occur, and deliver every project with excellence in performance, quality, and protection.
