

Public Private Partnerships

Turner Surety and Insurance Brokerage, (TSIB) understands that effectively managing a Public Private Partnership (P3) is a delicate balance between the social needs of a Public Entity and the For-Profit culture of the Private Sector.

Our goal is to create successful outcomes for our clients, so they can capitalize on every opportunity. We look at risk from every angle: strategically, financially and operationally. TSIB wants to ensure you are protected. We have the ability to be:

1. Advisor to the Public Entity
2. Project Insurance and Technical Advisor
3. Insurance Advisor to the Lender
4. Equity Group Insurance Advisor

As one of the leading insurance brokers, we have the most experienced professionals who design specific risk management strategies that fit each client's unique business needs. Our ability to advise any party on their risk comes from our background. Our history shows our expertise in handling Large Construction Projects, Owner Controlled Insurance Program (OCIP) and Contractor Controlled Insurance Programs (CCIP) and overall Insurance Risk Management. Additionally, our global network of partners and colleagues, including our parent company Hochtief USA, complements our overall P3 experience.

We are with you all the way.
